Office Action Summary	Application No. 10/759,431	Applicant(s) TOMARU ET AL.	
	Examiner David M. Fenstermacher	Art Unit 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/467,917, filed on 12/21/99. **Information Disclosure Statement**
2. The IDS, filed 1/20/04, has been considered in full.

Drawings

3. The drawings, as originally filed, are acceptable as formal.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite that the adjustments are done "automatically". This is indefinite since it is not clear how the adjustment can be automatic. It would seem that the adjustments would need to be initiated by the operator, and thus, are not automatic.

Claim Rejections - 35 USC § 102

Art Unit: 3682

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Arvidsson (5,035,446 - cited on IDS of 1/20/04).

Arvidsson shows the claimed invention including tilt and length adjusting drive members (20, 21) in the form of threaded rods (23, 27), the threaded rods are connected to brackets (25, 29). Upon actuation of the drive members (20, 21), the steering column either tilts (using drive member 21) or adjusts the length (using drive member 20 which slides the inner column member with respect to the outer column member). An auxiliary member (11) being attached to the inner side of the inner column member in advance (the members must be assembled in advance of installing in the vehicle). The lower portion of the steering column (as at 14) is connected to the subsequent linkages by a universal joint which is inherent in all steering columns of this type (see e.g. Forbes-Robinson et al. 5,992,863)

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Forbes-Robinson et al. ; Wilson, Tomaru et al. ; Yoshizawa et al. all show steering columns which adjust.
